## SUMMARY

Yashraj Basan is a Senior JavaScript Developer with over 4.5 years of experience, he has worked with a diverse range of sectors, including fintech, retail, and voip, on small to large projects. My specialization lies in developing high-quality web applications, and I possess expertise in utilizing technologies such as JavaScript (Typescript), React, Node, Express.js, Mongodb, and Socket.io. I have also worked with AWS Cloud services such as – Lambda and S3.

## KEY PROJECTS AT SRIJAN

### Senior JavaScript Developer, [YAMAHA Group](#)

- Developed, maintained and shipped production ready code
- Implemented reusable react components and integrated with context
- Implemented scalable architecture for cart page

## OTHER KEY PROJECTS

### Software Engineer, [Kredx](#)

Kredx is a fintech organization and India's largest Supply Chain Finance platform.

- Automated AWS S3 bucket deployment process by building CI/CD pipeline using Github action and Node.js
- Developed and deployed REST APIs using Node.js, Express.js for authorized amount and assessing user eligibility in Platform.
- Reduced product expenses 1-5% by eliminating dependencies on low code development platforms.
- Designed reusable components for a design system using typescript and conducted unit testing with Jest.
- Assisted and mentored a team of 2 frontend developers in building a react app

### Senior Software Engineer, [Appitsimple](#)

Appitsimple is a product-based company. there clients include emirates visa services, schengen visa services, cuemath, talentspark

- Developed pause, resume call recording REST APIs using Twilio, Node.js, Express.js, React, Redux
- Developed a complex calling system using React, Node.js, Express.js, MongoDB, Twilio APIs,Socket.IO
- Developed scalable REST API using Node.js and Express.js to store call recordings in AWS S3 Bucket with pre signed urls.
- Improved Node REST API performance by 10-15% by optimizing Mongodb queries and reducing latency for large records

- Increased frontend web performance 50-60% by optimizing React components

## Senior JavaScript Consultant, [Qxf2 Service](#),

Qxf2 provides testing services to startups

- Developed a utility script using Node.js to automate the documentation update process, resulting in a 100% reduction in manual effort.
- Boosted project efficiency by proactively managing and optimizing Node.js and Express.js REST APIs, implementing an error-handling architecture.
- Mentored team members in using design patterns like the page object model to write DRY code
- Assisted in building a TestCafe based end-to-end testing automation framework

## Full Stack Developer, [Xcitech](#),

Xcitech Technologies, located in India, is an IT consulting & outsourcing firm offering custom software development services.

- Developed Scalable REST APIs using Node.js and Express.js with MVC pattern
- Developed reusable components using vue.js and integrated vuex for better state management

## Cheesepens, [Visit](#) | [Case Study](#)

Simplified Branding, Enhanced User Trust, Streamlined Operations, and Achieved Remarkable Cost-Effective Solutions for CheesePens

## Note It, [Visit](#)

Note It is my open-source personal project which is getting used by 100+ users, it allows you to store website text content, share notes, and export them as text files with privacy

## SKILLS

Reactjs

- Node.js
- Express.js
- HTML
- CSS
- SCSS/LESS/CSS in JS
- Redux
- MongoDB
- ES6
- Mocha
- Jest
- GIT

# srijan:

A  
Material+  
Company

- Github
- Bitbucket

**Familiar:** AWS

- Docker
- CI/CD
- Next.js
- Redis
- GraphQL
- SQL

## EDUCATION

**Parul University**

B.Tech in Computer Science, 2016- 2020
